

February 2018

Dear Skin Care Professional

We have identified a gap in our rapidly changing industry in that our therapists are not familiar with the Medical aesthetic aspects of skincare. We have to rely on agents, and product houses for this information and then it can be bias towards their particular product or piece of equipment and as skin care professionals we need to keep up to date with the latest ingredient trends and treatment programmes and know how to choose the correct products or equipment.

Philippa Crichton has been a pioneer in our industry for many years trying to make a difference and give skin care therapists the recognition they deserve as well as a credible name next to the medical fraternity.

She has put this ethos in to working progress and would like to share her knowledge and expertise with Medical aesthetics and combination therapies. She spent the better part of 2011 compiling a “post graduate” training module for skin care therapists wanting to expand their knowledge.

Please find the Medical aesthetic training programme below:
